

EXAMINATION STATISTICAL REPORTING

Various exam vendors will supply DPOR via e-mail with statistical data to be imported into a relational database table for online review and updates as well as batch reporting.

An online application is to be developed to both manage the data being imported from exam vendors as well as insert data not being reported from the exam vendors. This online application is to be available for all agency staff use limited only to their respective board/occupation information.

The exam vendors will be asked to send us statistical data respective to each exam given. We are requesting data to be electronically transmitted via e-mail to a designated DPOR mail box (EXAMS.POST@DPOR.VIRGINIA.GOV). The data will be in ASCII format written to a fixed length, non-delimited file. Numeric fields must be right justified with decimal position included where noted. Text fields must be left justified with spaces filling the remainder of each field. There will be four types of statistical data records reported for each exam given. Record types #1 will contain general statistics, Record types #2 will contain content area statistics, Record types #3 will contain statistics by exam region. Each record format follows:
